Environmental Chemistry & Society

This is a special session focusing on the intersection of Environmental Chemistry & Society, including invited speakers and panel discussion on the themes of climate change, marine contaminants, citizen science, and indigenous perspectives.

Invited Speakers and Panel Discussion

Tuesday, June 6th

9:00- 10:30

West Meeting Room 214

Indigenous laws and science: understanding and applying synergies between Indigenous science and Western science

Dr. Myrle Ballard

Director, Indigenous Science, Environment and Climate Change Canada
Assistant Professor and Indigenous Scholar, Department of Chemistry, University of Manitoba

We need to talk: why chemical mobility deserves more attention

Dr. Roxana Suehring

Assistant Professor, Analytical Environmental Chemistry,
Department for Chemistry and Biology, Toronto Metropolitan University

Community engagement for enhancing local and global resilience in the era of climate change

Dr. Hind Al-Abadleh

Department of Chemistry and Biochemistry
Wilfrid Laurier University

Communicating the Molecular Basis of Sustainability to the Public

Dr. Peter Mahaffy

Professor of Chemistry, The King's University, Edmonton, Canada
Director, King's Centre for Visualization in Science

We would like to thank the generous support of our sponsors who have made this event possible.
